

# "New ligands for gold: adventures into the unknown"

Cristina Nevado

Department of Chemistry  
University of Zurich, Switzerland.

[cristina.nevado@chem.uzh.ch](mailto:cristina.nevado@chem.uzh.ch)

## Biography:

Cristina Nevado graduated in Chemistry at the Autónoma University in 2000. In October 2004 she received her PhD from the same university working with Prof. Antonio M. Echavarren thereafter joining the group of Prof. Alois Fürstner at the Max-Planck-Institut für Kohlenforschung (Germany) as a post doctoral associate. In May 2007 she started her independent career as an Assistant Professor of Organic Chemistry at the University of Zürich. In 2011, Cristina was awarded the Chemical Society Reviews Emerging Investigator Award and the Thieme Chemistry Journal Award in recognition of her contributions in the field of synthetic organic chemistry. In 2012 she received an ERC Junior Investigator grant and in 2013 was awarded the Werner Prize of the Swiss Chemical Society and was directly promoted to Full Professor. In 2019, she received the Royal Society of Chemistry Award in Organometallic Chemistry and in 2020 the Excellence Research Trajectory Award of the Royal Spanish Chemical Society (RSEQ). Among her many contributing roles to the community, Cristina is currently Senior Associate Editor for ACS Central Science, Organic Syntheses and Science of Synthesis. Rooted in the wide area of organic chemistry, her research program is focused on complex chemical synthesis and new organometallic reactions.
