

Brief biosketch Prof. Efstathios Z. Panagou
Agricultural University of Athens, Grècia

Dr. Efstathios Z. Panagou is Professor of Quantitative Food Microbiology at the Agricultural University of Athens. He obtained an MSc in Postharvest Technology from Cranfield University in the UK and a PhD in Food Microbiology from the Agricultural University of Athens. His research focuses on rapid and non-invasive technologies for food quality assessment, predictive food microbiology and modelling, microbial ecology and fermentation of plant-derived foods,

particularly table olives, and predictive mycology with emphasis on mycotoxigenic fungi. He has co-authored more than 140 peer-reviewed scientific publications, 16 book chapters, and is co-inventor of the “Probiotic Olives” patent.
